

## **For Immediate Release**

Regarding: Tall Acoustic Wood Door

Overly Door Company, an ISO 9001 Certified Company located in Greensburg, PA, is pleased to announce that it now offers its Wood Acoustic Door in a maximum size of 4' wide x 10' tall for all 1-3/4" door models and the newly developed STC 50 2-1/4" thick door.

The original door leaf maximum size was 4' wide and 8' tall. Doors 1-3/4" thick up to 4' x 8' are UL fire rated for 45 minutes to UL Standard for Safety 10C.

Available tested features on specific models of Overly Acoustic Wood Doors include dual glazed vision lights; level swing hinges with fully mortised automatic door bottoms; or, Overly Cam-Lift Hinges with Super H door bottoms. Contact factory for specifications on particular models.

Overly offers both FSC and non-FSC traditional and exotic wood veneers factory finished in colors custom matched to your specific project needs. For non-traditional looks, select from a complete line of plastic laminates. For full details, visit [www.overly.com](http://www.overly.com) or email [overly@overly.com](mailto:overly@overly.com).

Overly Sound Control Products have always been lead-free, asbestos-free and contain no added urea-formaldehyde, including both UL fire rated and non-fire rated wood acoustic door systems.

For over 50 years, Overly Door Company has been an industry leader in the design, testing and manufacturing of Architectural Acoustic Door and Window Systems. Because of the unique manufacturing methods and patented designs, Overly Architectural Acoustic Wood and Plastic Laminate Doors are lighter weight than most comparable doors on the market.
