BOLT IN INSTALLATION
IN EXISTING POURED CONCRETE WALL
OR EXISTING MASONRY WALL

BUILT-IN INSTALLATION
IN NEW MASONRY WALL

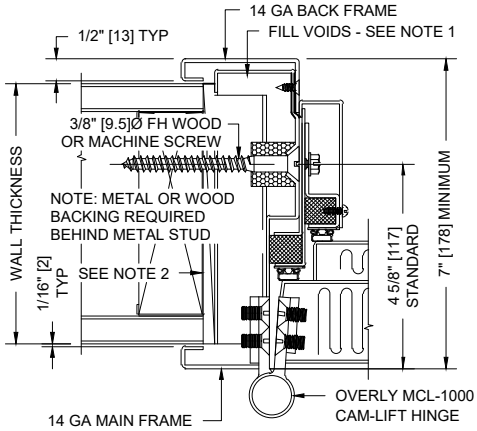

BUILT-IN INSTALLATION
IN NEW STUD WALL

NOTES:

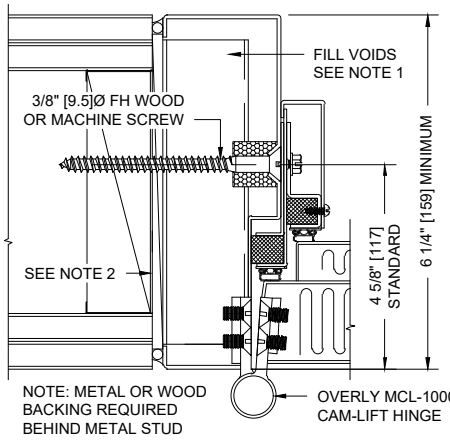

1. Head and jambs of frames equipped with masonry anchors must be grouted full in field. Bolt-in type frames must have all voids in head and jambs packed with 6 to 12 pound density mineral wool and all voids between wall and frame continuously caulked.

2. For anchorage systems used in all steel or wood stud walls, it is recommended a structural tube or reinforced stud is run from and anchored to floor slab and ceiling structure above.

3. Custom frame profiles and anchorages available. Consult factory with your specific project needs.
