

Model MCL-3000

Cam-Lift Hinges

Mortise Type

The Overly MCL-3000 mortise-type cam- lift hinge was developed for use primarily with large, oversize sound doors to improve sealing characteristics along the door bottom.

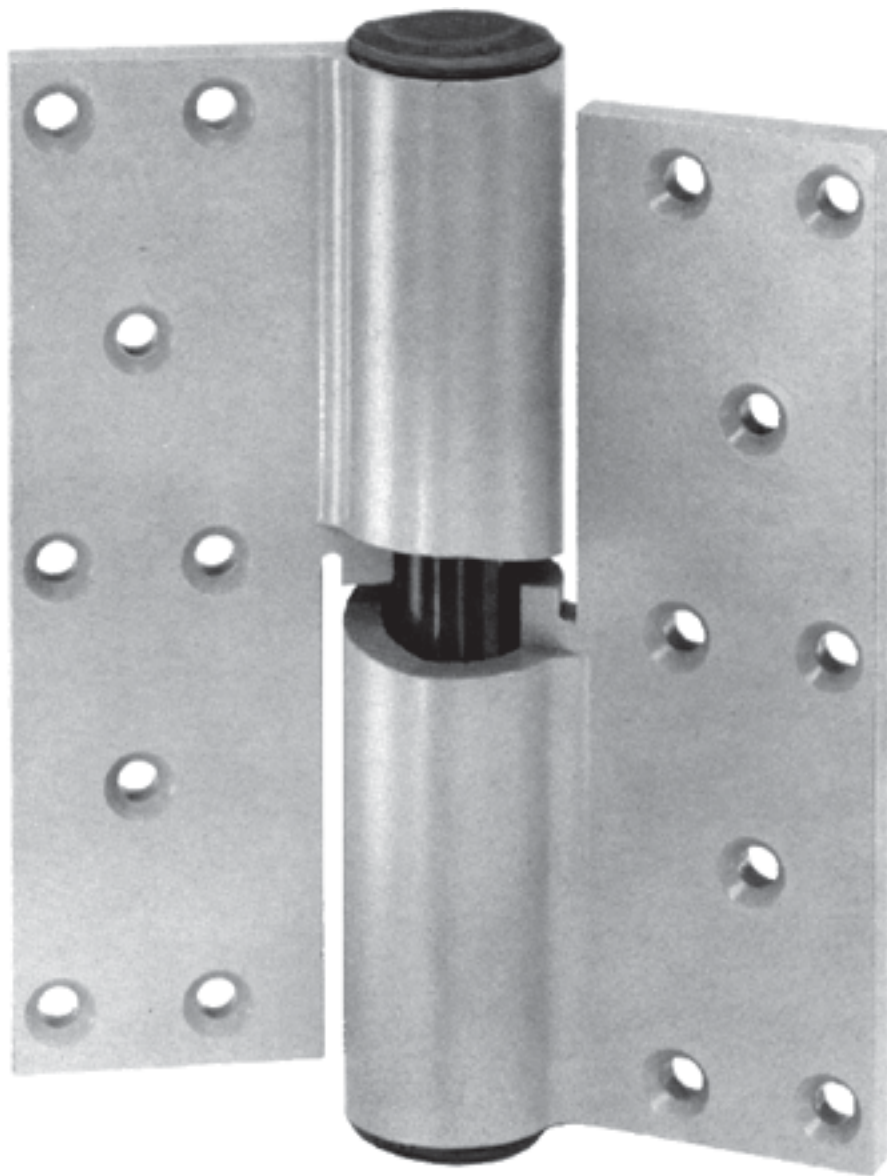

They also have application where weatherstripping across a flush threshold is required.

Produced in two models, one for right and one for left swinging doors, it is a true template hinge, lifting the door 1/2" when the door is fully opened.

It is made of investment cast stainless steel and precision machined to accept a hardened pin.

Designed for use on doors weighing up to 3000 pounds

Specify hand when ordering.
Mounting screws supplied.
